Summary

I am a highly skilled and experienced Information Technology professional with a passion for helping businesses achieve their goals through technology. I have over 1 year of experience in a variety of IT roles, including systems administration, and software development. I am proficient in a wide range of technologies, including Office 365, Stack Development, C#, Python, .NET Framework, HTML5, Analytical Skills, Microsoft Office, web management, Team Leadership, Engineering Management, and Database [SQL].

In my previous role as a WIL (Work Integrated Learning) student at the Central University of Technology, Free State, I was part of a team that created a web site with JavaScript, C# and Html5 which had an online database [Firebase] and a mobile application using Dart and Flutter with Backendless as the database. I also assisted Lectures with their day-to-day practical classes and held supplementary instruction class for the students who were having difficulties in understanding the content.

I am a highly motivated and results-oriented individual with a proven track record of success. I am also a team player and I am always willing to go the extra mile to get the job done. I am confident that I have the skills and experience that you are looking for in a candidate. I am eager to learn new things and I am always looking for ways to improve my skills. I am confident that I can make a significant contribution to your team.
